

Business Insurance Solution for Joint Commission Accredited Firms

Manchester Specialty is proud to collaborate with The Joint Commission, an independent nonprofit organization whose goal is to drive quality patient health care and safety through standards-setting and accreditation.

- ✓ Manchester Specialty and The Joint Commission are pleased to be working together to raise awareness of the value of accreditation relative to business insurance underwriting and pricing.
- ✓ Program is available on a national basis to all eligible home care/hospice firms, with pricing advantages given to Joint Commission accredited firms (where state regulators allow, and based on each individual account).
- ✓ Insurance program includes all the coverage needed to operate, including workers' compensation, professional liability/general liability and "Package" coverage including property, auto/non-owned auto, abuse, crime and cyber liability.
- ✓ Joint Commission accreditation is a positive underwriting attribute, and firms are recognized as quality organizations.
- ✓ Accredited firms can access Manchester Specialty through their own local insurance agent or broker of choice.
- ✓ Insurance premium savings help to offset the cost of accreditation.

You or your local insurance agent/broker can contact us for more information:
