

Business Insurance Solution for Joint Commission Accredited and Certified Firms

One80 Manchester Specialty is proud to collaborate with Joint Commission, an independent nonprofit organization whose goal is to drive quality patient health care and safety through standards-setting and accreditation/certification.

- ✓ One80 Manchester Specialty and Joint Commission are pleased to be working together to raise awareness of the value of accreditation/certification relative to business insurance underwriting and pricing.
- ✓ Coverage options are available on a national basis to all eligible Health Care Firms, with pricing advantages given to Joint Commission accredited/certified firms (where state regulators allow, and based on each individual account).
- ✓ Insurance solution includes all the coverage needed to operate, including workers' compensation, professional liability/general liability and "Package" coverage including property, auto/non-owned auto, abuse, crime and cyber liability.
- ✓ Accredited/certified firms can access One80 Manchester Specialty through their own local insurance agent or broker of choice.
- ✓ Insurance premium savings help to offset the cost of accreditation/certification.

You or your local insurance agent/broker can contact the One80 Healthcare Team for more information:
